

EDUCATION, POSTGRADUATE TRAINING, SPECIALIZATION

We graduated from the **Faculty of Dentistry within The Institute of Medicine and Pharmacy in Timișoara in 1984**, realising our graduation thesis at the **Department of Prosthodontics of Prof. Dr. Robert Nussbaum**, one of Romania's most famous prosthodontists.

Graduation thesis titles: Dr. Svetlana David - Electromyography in the investigation of occlusal dysfunction, grade 10; Dr. Voicu A. David – Removable prosthetic restoration on abutments, grade 10.

We have undergone **the three years of postgraduate training** in the Dental Dispensary "Aurel Vlaicu" Adults in Arad (**1984 – 1987**), run by one of the founders and promoters of quality dentistry in Arad - **Dr. Iacob Drijman**, enjoying a professional library, enviable thanks to the comprised international literature, as well as the traditional exchanges of experience and professional information that took place every Wednesday.

During the postgraduate training we had as coordinators **Dr. Cornel Barna and Dr. Ioan Nicolaescu**, having the chance to perform here since the first year (1984) cast dentures, metal-ceramics, composite reconstructions, removable dentures, etc..

Following the postgraduate training (**1987 – 1990**) we were assigned (without the benefit of the choice between several locations according to the national ranking), the following successive working places: Dărăbani, Ungureni, Săveni, (jud. Botoșani), Beliu, Craiva, Pecica, Ghioroc, (jud. Arad).

In **1991** we entered through exam in **the three years of postgraduate specialisation in general dentistry** at the I.M.F. Timisoara, graduating the final examination in **1993** and obtaining the dental specialists certificates of general dental practitioners with grade 10.

Since **1992** we are working in our private dental office where we have been practiced and are practicing general dentistry, basic link for oro-dental health care for all ages.

We have voluntarily and regularly participated in numerous lectures, symposia, congresses, for continuous updating of knowledge, techniques and methods of prevention, diagnosis and dental treatment.
